"HAPPY THOUGHT" RANGES

SERIES S1812-82012-92012

* * *Features* : * *

BODY all cast iron, perfectly proportioned, the latest success in the art of stove making and designing.

FIRE-BOX. In this foundry was the birthplace of DUPLEX GRATES and Perfect Fire Boxes, and we believe our experience has taught us how to avoid errors in this most important feature. The Duplex Grates used in "Happy Thought" Ranges are the most economical and durable Grates made. Our Fire-Box construction is **perfect**.

OVENS are evenly heated on all sides by reason of our most excellent and ample flue construction. The top oven plate is coated with asbestos, as is the bottom flue, and perfect baking and roasting is guaranteed. Oven Thermometers are furnished with each range; a great convenience in baking.

ASH PIT. Each range is supplied with an extra large Ash Pan. The Ash Pit is of extra depth, which is a strong feature.

WATER FRONTS are made so as to give plenty of hot water, and speedily, and are tested thoroughly before leaving the factory.

TOPS of "Happy Thought" Ranges are made in the best-known manner. To avoid warping and cracking, they are made in SECTIONS. The long centers or cross-pieces are made in two parts. With each range is supplied a sectional cover, convenient when using smaller dishes than the regular size.

NICKEL. The Oven Shelf, Tea Trays, Table part of High Shelf, also the Removable Bands on the top of range, and hearth are handsomely nickeled.

ALL IN ALL the "Happy Thought" is the Smoothest and most handsome range made by any manufacturer, likewise the **BEST**.
