

HOUSEHOLD RANGES

The double mantel shelf adds to the fine appearance and has two roomy shelves for cooking dishes.

The Household end gas oven and broiler attachment is a wonderful convenience as the gas oven can be used for hot weather cooking and the coal oven for cool weather, and when a lot of baking is required both gas and coal ovens can be used at the same time. (See illustration on page 1.)

Dimensions of Household Charm Range

No.	Range without Attachments			Range with Reservoir		Range with End Gas Oven		Coal Range Oven			Gas End Oven			With Mantel	Coal Fire Box		
	Length	Width	Height	Length	Width	Length	Width	Length	Width	Height	Length	Width	Height	Height	Length	Width	Height
7-16	40	25	29	—	—	—	—	16	16	10	—	—	—	50	13	6	6
8-188	43½	27½	29¾	47	27½	56	27½	18	18	10½	19	13	10	50	16	7	6

Household Ranges

BUILT TO BAKE

The Household Charm

With end gas oven, broiling compartment and cast iron mantel shelf. A plain open base range for burning gas, coal or wood, in two sizes. Made in grey porcelain enamel or in regular black iron as shown

HOUSEHOLD RANGES

The Household Charm is a well proportioned plain range of medium size, modern in every particular and an ornament to any home.

The oven is good size and bakes equally well on the plain cast iron shelf or bottom—which means that two rows of food may be evenly baked at one time.

The Household oven thermometer registers the baking heat with unflinching accuracy and shows at a glance when to open or close the front draft slide.

Triangular revolving grates or the plain flat grate can be furnished for burning coal. When wood is to be burned permanently Household wood fixtures can be supplied and are very efficient.

Powerful water fronts of plain cast iron or with galvanized coating throughout can be had for heating water, as well as brass pipe coils.

BUILT TO BAKE

The Household reservoir attachment is fitted with a removable copper tank made of heavy gauge metal, strong and durable. It holds several gallons of water and heats very quickly. The reservoir damper controls the heating perfectly at all times.

The mantel shelf is of plain cast iron with two nickel side shelves as well as a roomy top shelf which is very convenient for holding dishes when cooking and protects the kitchen wall as well.

The ash hearth is deep and roomy and has a sturdy ash pan fitted with metal handle to make it easy to remove and carry.

The door handles are a plain cast iron design placed at the top of doors convenient to reach without stooping.

The oven door pedal unlatches and opens the door by a slight pressure of the foot when both hands are full.

The fire box is good size and carefully proportioned to heat the oven and supply hot water to the kitchen boiler.
